Quarterly Earnings Summary

Net revenues for the three months ended December 31, 2006 included performance fees of \$25.9 million (three months ended September 30, 2006: \$10.4 million; three months ended December 31, 2005: \$16.4 million). Operating expenses for the three months ended December 31, 2006 included the benefit of \$21.8 million of insurance recoveries. Operating expenses for the three months ended September 30, 2006 included a charge of \$41.1 million, representing the cumulative previously unrecognized cost of performance-based options awarded to AMVESCAP employees in 2003. The remaining cost amortization for these options of \$3.6 million is included in the operating expenses for the three months ended December 31, 2006.

Annual Earnings Summary

Net Revenues for 2006 were \$2,414.6 million (2005: \$2,173.2 million) and included performance fees of \$82.2 million (2005: \$33.5 million). Operating expenses for 2006 were \$1,629.2 million (2005: \$1,672.9 million before the restructuring charge). The 2005 restructuring charge of \$75.7 million (\$58.3 million after tax, or \$0.072 per share) included staff termination, property, and fund rationalization costs associated with the multiyear strategic plan. Operating expenses for 2006 included a non-cash charge of \$44.7 million (\$0.04 per share, net of tax) relating to the performance options granted in 2003. No expense for these options was recorded in 2004 or 2005 as it was not considered probable at that time that the required performance targets for the vesting of these options would be attained. These options have now vested.

Net non-operating income increased \$33.7 million as a result of increased interest income, gains from investments and net foreign exchange gains. In 2005, a gain of \$32.6 million was recognized from the sale of the Retirement business.

Net Debt and Cash Flow

Net debt (total debt of \$1,272.7 million, less cash and cash equivalents of \$786.7 million, which excludes client cash of \$2.9 million) as of December 31, 2006 was \$486.0 million compared to \$608.5 million as of September 30, 2006, and \$733.6 million as of December 31, 2005. Client cash for 2006 decreased \$224.3 million since December 31, 2005. The decrease in client cash, which contributed to the movement in our operating cashflows, was primarily due to one depository account previously sponsored by one of our banking subsidiaries being replaced by an unaffiliated investment fund.

Dividends

The Board has recommended a final dividend for 2006 of \$0.104 per share, approximately \$85.9 million (2005: \$0.098 per share, \$80.3 million), resulting in a total dividend of \$0.181 per share, approximately \$149.2 million for 2006 (2005: \$0.172 per share, or \$139.4 million). The final dividend, if approved by shareholders at the Annual General Meeting on May 23, 2007, will be paid on May 30, 2007, to shareholders on the register as of April 27, 2007. The ex-dividend date will be April 25, 2007.

Assets Under Management

Assets under management (AUM) at December 31, 2006, were \$462.6 billion (2005: \$386.3 billion). Average AUM during the fourth quarter of 2006 were \$452.7 billion, compared to \$426.4 billion for the third quarter of 2006 and \$380.9 billion for the fourth quarter of 2005. Average AUM for 2006 were \$424.2 billion, compared to \$377.6 billion in 2005.

Long-term net outflows for 2006 were \$1.4 billion, with inflows of \$85.8 billion and outflows of \$87.2 billion. Long-term net outflows for the three months ended December 31, 2006 were \$4.5 billion, largely due to outflows in the institutional channel. Money market assets grew during the year with net inflows (not included in long-term flows above) of \$12.8 billion for the 2006 year. There were money market net outflows of \$1.5 billion in the fourth quarter of 2006. Further analysis of AUM is included in the supplemental schedules to this release.
